

## **Installation Instructions**

These steps will guide you through how to install the Vaccine Scheduling System.

### **Steps:**

1. If you don't have the project downloaded already, pull the project from:  
<https://github.com/maxjhop/CIS-422-Project-1>
2. Pip is required to install flask. If you do not have pip installed already, you can install it manually by running the program found at this link: <https://bootstrap.pypa.io/get-pip.py>. If you are on Mac or Linux, you can also install it by running the command "sudo apt install python3-pip"
3. Once pip is installed, run the command "pip install flask"
4. You now have all the required dependencies, you can start the server by running the python file flask\_main.py
5. Once the server is running, navigate to "localhost:5000" in your browser of choice, and the website should be displayed and available to use!
